\* Save Hundreds of Hours \* Teach Kids to Self-Calm \* Inspire Cooperation \*

### **Achieve Your Goals with Certification from Teach & Thrive Canada**

- Reduce teacher burnout, absenteeism, disability and turnover
- Inspire students to cooperate, learn and succeed
- Create safe and caring schools
- Prevent aggression, bullying, harassment & liability
- Increase EQAO scores by creating success mindsets
- Promote excellent public relations & earn a reputation as a world leader
- Recruit French Immersion teachers by offering a program that helps them get what they want most (support, respect, and appreciation)

Sharon Love, M.Ed., Founding Director, Teach & Thrive Canada:

- Researched and developed The Four Psycho-Social Success Secrets and Super Peace Monkeys™ for over 25 years
- Taught and trained educators Psycho-Social Success Secrets in French and English, in over 45 schools across Ontario
- Earned an M.Ed. (Master of Education) degree in Multicultural Psychology from OISE, University of Toronto
- Inspired over 2,000,000 people with her Psycho-Social Success Secrets and diversity learning programs, live & online
- Earned a Bilingual degree, Certificate of Bilingual (French-English) Competence and TESL Certificate from York University
- Created the Super Peace Monkeys™ System, wrote children's books sharing Psycho-Social Success Secrets and produced educational games for over 25 years

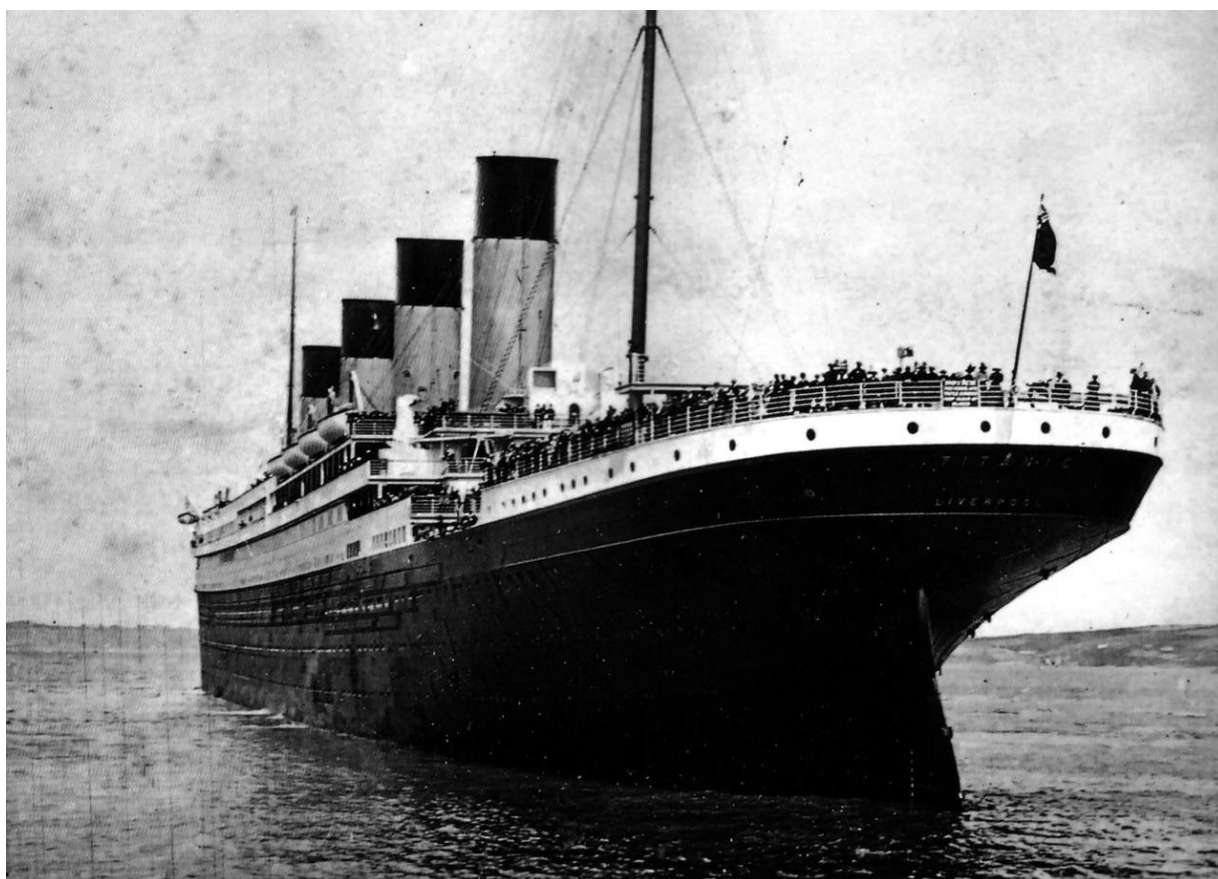

## SUPER PEACE MONKEYS™ CERTIFICATION

How You can Maximize Student Success and EQAO Scores with  
Speed Superlearning™ by Teach & Thrive Canada

Speed Superlearning™ by Teach & Thrive Canada creates the psycho-social conditions for success. To clarify the difference between Speed Superlearning™ and regular learning, imagine you are trying to learn a new language (for example, Spanish). In which scenario would you learn faster?

Titanic Learning Scenario...

In the titanic learning scenario, you are told to learn Spanish on the ship titanic, after it hits the iceberg. Your instructor yells above the din, “don’t make these common mistakes in this language!” Desperately, you are searching for a life boat and trying to keep from sliding into the ice cold waters below. They hand you a test as you cling to the railing in an absolute panic. On a scale of 0-100, where 100 is top speed, how well do you think you would do on your Spanish test?

The Titanic Learning Scenario is a metaphor for the psycho-social conditions under which many students are currently trying to learn. It is also a metaphor for the old industrial paradigm of education and society... in which you are never good enough, you are constantly anxious about sinking into the deadly waters of shame and failure, you need to be faster and drive profit at all costs (even at the cost of human life), humanity is vainly attempting to prove its dominance over nature, people are competing to the death, bullying is rampant, and there are those who are considered worthy of survival (first class) and those who are barred from the means of survival (second and third classes).

This paradigm leads to beliefs, feelings, and desperate situations that make it almost impossible for teachers to teach and students to learn.

### Fun Health Spa Retreat Learning Scenario...

You choose to learn Spanish at a health spa, with a collaborative team of people who are all committed to your success. You get to choose from a number of activities to learn Spanish, all with fun, friendly Spanish-speaking people who only speak to you in their native tongue. You can take courses in singing to your favourite Spanish songs, playing simple games in Spanish, reading Spanish learning textbooks, watching and discussing videos in Spanish, travelling with a friendly, Spanish-speaking guide, or whatever you want.

The teachers focus on the positive, and everyone celebrates your successes. Once you complete your course, you will be paid very well to do your favourite job in your favourite Spanish-speaking country, for as long as you like.

On a scale of 0-100, where 100 is top speed, how well do you think you would do on your Spanish test in this scenario? How many times faster would you learn in this scenario, compared to the Titanic scenario?

The Fun Health Spa Retreat Scenario represents the new educational paradigm, based on collaboration, fun, diversified instruction, equality, positive relationships, and intrinsic as well as extrinsic motivation. At Teach & Thrive Canada, we call this approach to education "Speed Superlearning™".

Speed Superlearning™ helps to create the psycho-social success skills and psycho-social conditions for students to learn over 1,000 times faster and more easily than they could in other conditions. It boosts their confidence, focus skills, motivation, and sense of safety in the classroom. Speed Superlearning™ is included in every part of the Teach & Thrive Canada programs.

### Research on Teacher Burnout and absenteeism

- In a recent survey of over 200 teachers, over 90% said that they “often feel exhausted and overwhelmed”
- 55% said that they had been suffering from frequent colds, headaches, insomnia, and other health issues... hence the millions of dollars of cost of supply teachers

What causes teacher burnout? In the survey, they said that...

- Lack of appreciation, respect and support for teachers was the #1 cause of burnout (named by 80% of teachers)
- Overwork and conflict (named by 72%)
- Student behavior issues (named by 62%)

### Teach & Thrive Canada Mission, Vision and Values:

- Our Mission: Empowering educators and parents to teach, thrive and inspire collaboration
- Our Vision: Together, we empower educators, parents and children with The Four Psycho-Social Success Secrets by Sharon Love, M.Ed.
- Our Values: caring for everyone in the school, and creating a better world
